Moral injury results from having to make difficult moral choices under extreme conditions, experiencing morally anguishing events or duties, witnessing immoral acts, or behaving in ways that profoundly challenge moral conscience and identity and the values that support them. Moral injury is found in feelings of survivor guilt, grief, shame, remorse, anger, despair, mistrust, and betrayal by authorities. In its most severe forms, it can destroy moral identity and the will to live. The struggle of combat veterans to return to civilian life can be even more difficult than serving in war and last a lifetime.
